

Protokol o zaměření technická zpráva

Číslo protokolu: SS001//pud-022/2016
Datum: 17. 2. 2016
Lokalita: Býšť

Objednatel:

PUDIS a.s.

Nad Vodovodem 2/3258
10031 Praha 10
IČO: 45272891

Zakázka: 022/2016 II/298 Býšť - Bělečko

Protokol: Výškopisný a polohopisný plán

Geodetické připojení

Souřadnicový systém:	S-JTSK	připojeno na:	body určené metodou GNSS, TB č.3 a 3.1 (1620) a 7(2416)
Výškový systém:	Bpv	připojeno na:	státní niv.značky Ea6-16.1 a Ead-37.1
Charakteristika přesnosti podrobného bodu		mxy:	0.14 m
		mh:	0.14 m
Použité přístroje:	Trimble 5603 robotic+TCU modrá, Trimble GPS 5700 Rover Chrudim		

Geodetické práce

Rozsah prací:

Popis prací:

Zaměřeno cca 3570 bodů na uliční čáře o délce cca 4,6km.

Předmětem prací bylo zaměřit výškopisný a polohopisný plán v úseku silnice II/298 zadaným objednatelem. Měřické práce proběhly ve dnech 2. až 9.2.2016. Měření bylo připojeno polohově i výškově do S-JTSK a Bpv pomocí bodů GNSS, správnost měření byla ověřena na trigonometrickém bodě č.3 a 3.1 (1620) a státních nivelačních značkách. Zaměření bylo provedeno trigonometricky totální stanicí Trimble 5503DR. Byly měřeny charakteristické lomové a výškové body. Výpočetní práce byly provedeny v programu Groma, grafické v programu AutoCAD 2007. Lesní úseky byly zaměřeny z polygonových pořadů, nejvyšší dosažená odchylka byla 0,07m. Výšky podrobných bodů byly z důvodu lepší čitelnosti redukovány o hodnotu 200,00m. Vlastnické hranice byly převzaty z Katastrální mapy digitalizované v kú Bělečko a Hoděšovice a z Digitální katastrální mapy v kú Býšť. Ve všech kú je však nutno počítat s mezní polohovou chybou hranice až 2,83m. Měřítko vykreslení je 1:500. K plánu byl vyhotoven digitální model terénu s ekvidistancí vrstevnic 1m. Výstupem je vektorový výkres ve formátu dwg a dxf pro AutoCAD2000, trojúhelníkové plochy DMT ve formátu XML a samotný model v AutoCAD Civil 3D 2011. V zaměření se poblíž propustků pod komunikací nacházejí pohledy na čela propustku a jeden řez. Součástí elaborátu je také album s fotografiemi jednotlivých bodů ZVS. Dne 16.2. byla dálkoměrem doměřena linie hranice zeleně (kmenů lesa) a výrazné solitérní stromy v lesních úsecích.
